EDITOR'S DISPATCH

Ancient places make us feel small, which is part of their appeal. They also make us over-confident. A guide points at a carving and tells you exactly what it meant, and for a moment you forget that someone, somewhere, spent a career arguing about it.

This month we have tried to keep both feelings. We have written about places with dates that are not in dispute, the Chola temples, for example, and about others where the dates and the stories are still being argued over. Where sources disagree, we say so. Where we could not check something, we say that too.
